The products delivered are manufactured in our own plants which are under regular control by the official government food inspector which have quality control management system and respect the good manufacturing practice directives.

We will inform the Authorities of the export country if we stop the production and the distribution of the corresponding products in the country of origin and/or Europe, and explain the reason why – and also if we will be no longer authorised to produce any of the food products officially authorised.

1. The corresponding products are freely sold in Europe and comply with the European regulations – notably concerning dietetic products. The products aren't pharmaceutical ones and don't contain any drug or doping substance.

The products comply with our finished product specifications (SPF).

Our products are free of alcohol in accordance with EC regulations.

2. Only authorized ingredients and complying with EC regulations can be used in our products, notably:

- Concerning vitamins and minerals enrichments, dyes and additives.
- Concerning BSE, Foot and Mouth disease.
- Concerning radioactive contamination, heavy metals and pesticides.

3. Regarding GMO, the product does not contain ingredients from Genetically Modified Organisms

- We are taking all necessary measures, notably with our ingredients suppliers to avoid the presence of GMO.
- If, in spite of all the appropriate steps we have taken, an adventitious presence of GMO occurred, on no account this presence could be higher than 0,9 % of the food ingredients individually considered

4. Only authorized packaging materials and complying with EC regulations can be used in our products, notably:

- Concerning food contact.
- Concerning heavy metals.

These products are marketed in the Poland
